PHILADELPHIA EAGLES

Software Developer Intern | Jul 2019 - December 2019

- Maintained data integrity and database structure of multiple SQL databases
- Analyzed data discrepancies between multiple providers to validate and clean data
- Restructured legacy SQL Server database to new format for statistics application

PROJECTS

Website/Blog: I keep a blog on my website: nickchiarulli.com where I document software and code. The source code for my website can be found on my Github. The blog was created using React, Gatsby, GraphQL, Markdown and is deployed on AWS.

Social Network App: Developed a social network application using MongoDB, Express, React, and Node which can be found on my Github.

Instagram Clone: Helped develop a mobile app based on Instagram, compatible with IOS and Android, using React Native, Firebase, and Redux.

Auction Web App: Lead a team project that allows users to buy and sell items in an auction style similar to Ebay, using Java, HTML, CSS, AWS MySQL. Deployed on AWS EC2.
